

Peter

Many, many thanks to yourself, your team and Glen for pulling out all the stops to get the installation of the fibre optic cables completed by the Clients end date of the 27.7.09.

The filling of the core hole through the floor to the airwaves room with intumescent foam (although the hole was not drilled by McD.B.) will if anything add to the professional reputation of Balfour Beatty Workplace and as such this will also reflect in a likewise manner on McDonald Brown (as will the professional manner in which the project has been delivered, from inception to completion.)

This may have been a relatively small project, but in terms of prestige and the reputation of Balfour Beatty Workplace this was extremely important project (the first to be carried out at the Lambeth 3Ci Building) and the fact that the project was delivered on time, to specification (quality) and to cost can only stand Balfour Beatty Workplace and McDonald Brown in good merit with the Met Police Authority.

Best Regards
Granville
