Dear Glenn

Ref: FOH – Project Completion

We would like to take this opportunity to thank everyone from McDonald Brown who was involved in the above project.

The project was of a particularly technical nature with regards to the uninterrupted power supply, backup generator together with the critical cooling system within the communications room and the comfort cooling system within the occupied areas.

As you know, it was essential to the programme that these works provided a smooth and seamless changeover due to the critical nature of the operations within the building whilst in full occupation, which was delivered with success. All of this work was installed to the highest of workmanship standards and to our client's satisfaction, we would also like to point out despite a tight and demanding programme all the works were project managed in a competent and professional manner.

Yours sincerely

Glenn Wright MRICS RMaPS
Project Manager
